Server listening for connections on port 3000
Client connected: Adis-ZenBook (192.168.1.111)
Message received: Hello second computer! from Adis-ZenBook (192.168.1.111)
```

Screenshot of the implementation for “send”, where it sends the client’s data to the server

```
/*
 * This method handles all data coming from the UI.
 * message - The message from the UI.
 * returns none
 */
public void handleMessageFromClientUI(String message)
{
    try
    {
        if (message.equals("send")) {
            sendToServer("First Name: Adi, Last Name: Bishara, ID: 212084859, Address: Haifa");
        } else if (message.equals("quit")) {
            quit();
        } else {
            sendToServer(message);
        }
    }
    catch(IOException e)
    {
        clientUI.display
        ("Could not send message to server. Terminating client.");
        quit();
    }
}
```
